LIVE-IN CARE – A GREAT OPTION

Senior Friends and Services, Inc. have specialized in Home Care Services since 1997.

Senior Friends and Services, Inc. is accredited by the National Institute for Home Care Accreditation, Inc. .

If you need Home Care or may very soon for a loved one, the Coronavirus (Covid-19) can cause concerns and challenges for our community unlike anything we have gone through before. We are dealing with having to work remotely from home, having to over-see our children's at home educations and social distancing and much much more.

Our **Live-in home care service** is one of the safest and best options available right now because:

1. One on one care from the same caregiver 7 days a week reduces the risk of any exposure that would be much greater if hourly and multiple care givers were caring for your loved one.
2. Home is a safe secure and controlled environment.
3. Continuity of care from the same caregiver everyday helps to know the client and their routines.
4. Senior Friends and Services, Inc. can give you "peace of mind" in knowing that your loved one is safe with a full-time Live-In caregiver, allowing you to continue to deal with this crisis and its demands and have "quality" visits with your loved one (of course with proper precautions).

Senior Friends & Services Inc.

876 Haddon Ave.
Collingswood, NJ 08108

(856) 854-8100 including a verbal screening prior to placement, temperature taken prior to (856) 854-7827 Fax

meeting a client and must be below 100.4.

6. We also ask the same protocol questions to our new client to ensure the safety of everyone including our staff.

7. The assigned caregiver can monitor your loved one for symptoms and temperature morning, noon and night. And report any changes immediately.

All caregivers follow Universal Precautions at all times and continue to self- assess and monitor their own health and report changes immediately to our agency which is available 24/7.

Protocol Questions:

1. Do you have or had any symptoms of illness such as cough, sore throat, fever or any breathing/respiratory problems.
2. Have you or any one you live with traveled recently to any regions of the world?
3. Do you live with anyone who has traveled via airlines or cruise in the last 14 days?
4. Has anyone you live with or within your close family/friend circle that you have visited have any symptoms of Covid-19 or test positive?
5. We can provide our services as a short-term option (no long term commitment or contract) until the virus concerns have abated and things get back to normal for all of us. We can set things up for just a one week minimum.

Please visit our website Senior Friends and Services Inc. or call 856-854-8333 for more information.

Stay safe,

Mary Wright R.N. BSN CCM
